SUMMARY

Legal Engineer at Tradespace, building tools that help companies understand and act on their intellectual property. Six years delivering enterprise migrations, integrations, and implementations where software meets messy real-world systems, preceded by a decade leading programs and organizations in the nonprofit sector. I translate ambiguous business requirements into working software and get it into production.

CORE SKILLS

- Software Implementation
- Data Migration & Cleanup
- API & Systems Integration
- Solution Architecture
- SQL & Data Analysis
- JavaScript & Python
- CI/CD & Release Management
- Technical Program Management
- Legal Technology

PROFESSIONAL EXPERIENCE

Legal Engineer, Tradespace Charleston, SC · Apr 2026 – present
Building tools that help companies understand and act on their IP.

Senior Implementation Manager, Case Status Charleston, SC · May 2025 – Apr 2026

- Led 5–15 concurrent implementations of a legal-technology platform for law firms, from discovery and scoping through data migration, configuration, integration, and go-live.
- Extracted, cleaned, and normalized legacy CRM and operational data, and designed safeguards for cases where normalization wasn't possible.
- Standardized integration patterns to reduce custom rework and increase repeatability; documented integration architecture and data flows for internal and customer audiences.
- Partnered with Product to prototype and validate features based on recurring implementation friction; served as escalation point for technical issues.

Technical Consultant, Salesforce Remote · Feb 2024 – May 2025

- Led the end-to-end development lifecycle for sunsetting a legacy customer-service platform at a Fortune 500 financial services company: requirements, solution architecture, story writing, build, and post-release support.
- Directed an offshore development team delivering a call center solution for 300+ users handling 10M+ transactions annually.
- Owned CI/CD pipelines and release governance; coordinated dependencies across a 20-team Agile Release Train.
- Change leader for AI-assisted development tooling across a global Professional Services organization; member, Professional Services Advisory Council (FY26).

Associate Technical Consultant, Salesforce Remote · Jun 2021 – Feb 2024

- Technical lead for a customer knowledge-portal implementation: custom front-end components, third-party integrations, and data migration, from Adobe XD designs through go-live.
- Led a pro-bono nonprofit engagement that replaced days of manual monthly calculations with real-time reporting.
- Presented development best practices to a global audience of 300+ consultants.

EARLIER LEADERSHIP EXPERIENCE

Executive Director, Second Chance Bikes Charleston, SC · 2018 – 2021

- Led concept-to-launch of a community bike shop and multiple nonprofit programs, yielding a 10x increase in service delivery and 100x growth in revenue; grew from 2 volunteers a week to 3 staff and 65 monthly volunteers.

Director of Administration, Turtle Survival Alliance Charleston, SC · 2016 – 2018

Program Manager, New Orleans Kids Partnership New Orleans, LA · 2011 – 2014

- Owned measurement, evaluation, and reporting for a 40-organization education collaborative; impact analyses contributed to a \$1M Blue Cross Blue Shield grant.
